## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of invention of Group 2 (claims 17, 19-20) in the reply filed on 8/19/2008 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17 and 19-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sirhan et al.-US2002/0082679A1.

As to claims 17, 19-20, Sirhan-'679 (Fig. 2L; sections 136, 163, 164, 176, 178) discloses stent 16 having openings 58 to receive therapeutic agent 28, wherein agent 28 in a solvent is sprayed onto stent 16 in a manner substantially as recited in the claims. Notice that a spraying dispenser will cause a cloud of evaporating gas adjacent to the dispenser tip as recited in the claims.

Alternatively, it would have been obvious to one of ordinary skill in the art to recognize that a cloud of evaporating gas will exist during a spraying process of stent 16 substantially as recited in the claims.
